Current Position

Postdoctoral Fellow, Kellogg School of Management, Northwestern University, 2025 - present
Supervisor: Nancy Qian

Education

Ph.D. in Economics, Toulouse School of Economics, 2025
Thesis: Essays on Economic History and Political Economy
Advisors: Victor Gay, Paul Seabright, Mohamed Saleh (first two years)

Visiting student, Department of Economics, Northwestern University, April-July 2024
Host: Joel Mokyr

M.A. in Economic Theory and Econometrics, Toulouse School of Economics, 2020

B.B.A. in Economics, The Chinese University of Hong Kong, Shenzhen, 2018

Research Fields

Primary: Development Economics, Political Economy, Economic History

Secondary: Culture and Institutions, Gender, Media

Job Market Paper

The Transmission of Son Preference

Abstract: This paper examines how culturally rooted son preference contributes to missing women. I exploit the quasi-random settlement of mainland Chinese migrants in Taiwan and measure their cultural backgrounds using ancestor worship in their places of origin. Local families exposed to migrants from origins with stronger ancestor worship are more likely to continue childbearing without a son and, after the Legalization of Abortion in 1985, to select sons at higher birth orders. Among second-generation migrants, sex selection is associated not only with the ancestor worship of their fathers' places of origin but also with those of other migrant groups in their communities. The evidence shows how a preference for sons is sustained across generations and spreads beyond the families that pass it down, contributing to missing women.

Working Papers

Media Exposure and Job Choice with Mingduo Zhao (University of British Columbia)

The Economic Determinants of Taiwanese Sentiments towards Reunification with Mainland China with Yu-Chi Hsieh (Northwestern), Nancy Qian (Northwestern), and Marco Tabellini (Harvard)
